

RESIDENT INPUT SUMMARY
Ed Reidy, Superintendent of Parks
11/19/19 to 1/16/20

Old Business:

- 6/11 – A Lighthouse Pointe resident called to review a conversation we had regarding dead trees and weeds in the woods behind his home.
 - 6/12 – I scheduled our native area contractor, Cardno, to identify the plants in this area.
 - 6/12 – I left a message for the resident, stating that Cardno may remove non-native invasives, but would leave native plants, and that park staff would remove the small dead tree in the same area.

Nothing new to report

New Business:

- 1/9 – A Girl Scout reached out with information that she would like to use for a project at the Union Creek Park playground that incorporates elements of STEM (Science Technology Engineering and Mathematics), and how they affect those playing on a playground. More information will be provided at the February Board Meeting.
- 1/15 – A Community Park resident called about solar lighting that was removed from the park and asked when it would be returned. I explained the poles were defective and needed to be replaced.
 - – 1/16 I emailed the lighting contractor and am waiting for a reply.
